

## Aircraft MRO Services

Future Metals created its "Aircraft MRO Services" division to provide the aircraft maintenance repair and overhaul industry with a focused dynamic supply chain partner who understands and can respond to their needs. Future Metals - Aircraft MRO Services carries a broad inventory of aircraft quality metals and other specialty products such as seat tracks, seat track covers, welding rod, safety wire, flight control cables and more. In addition, we offer a variety of services; these include a 24 hour a day AOG response team, specialty packaging solutions, materials processing services and a variety of inventory management programs. Our MRO specialists are standing by to assist you with your needs at 1-844-AOG-DESK (1-844-264-3375) or simply email your requirements to [AOG@FutureMetals.com](mailto:AOG@FutureMetals.com)

## Case Study

A customer in Spain had an AOG raw material requirement after normal working hours on a Friday when the Future Metals' European division was already closed for a long holiday weekend. The customer remembered being told about Future Metals' new AOG email address and promptly sent an email describing their need. The email was routed to an AOG specialist at another Future Metals facility who was eager and waiting to help them. The request was quoted; order submitted, processed and shipped within four hours because of the AOG service that Future Metals offers.

## Seat Tracks

### Now Stocking Airbus Seat Track

<b>Part Number:</b>	<b>Aircraft Application:</b>
ABS5080A536	A330/A340
